Subject: Medical marijuana

To whom it should concern,

While I understand you don't represent all of the citizens living in Elko, the unrepresented will be heard.

Medical marijuana was legalized in Nevada in 2001. Dispensaries were operational in 2015, The City Council has outlawed a legitimate business enterprise in Elko.. That seems almost criminal. Folks who need to use it are forced to drive hundreds of miles to acquire natural relief for their medical needs. Instead they are encouraged to use addictive chemical cocktails that are very destructive and inefficient for many, but are readily available. Elko needs a medical marijuana dispensary for medical needs.

Please listen and think, if possible.

Sincerely, Patty Meyer
