ADDENDUM NUMBER ONE
to the
**COPPER STREET WATER MAIN RELOCATION
BID DOCUMENTS, SPECIFICATION AND PLANS**

To all prospective bidders under the specifications for the **Copper Street Water Main Relocation**, for which bids are to be received by the City of Elko, at the office of the Elko City Clerk located at 1751 College Avenue, Elko, Nevada 89801, until 3:00 P.M., local time, on Friday, February 3rd, 2012.

The following changes, deletions and additions are herein made and become a part of the Project Bidding Documents, Specifications and Plans for the above referenced Project.

1. CITY IS RESPONSIBLE FOR:

- Providing construction surveying by Chilton Engineering.
- Providing construction testing by Thurston Testing Laboratory.

2. CONTRACTOR IS RESPONSIBLE FOR:

- Any Retesting and Resurveys needed as a result on the Contractors operations.
- Providing traffic control meeting current MUTCD specifications to include two concrete barriers at Station 0+75 during open trench construction. This amount shall be included in the bid item 17 Mobilization and Demobilization.
- Providing a traffic control plan meeting current MUTCD specifications. This amount shall be included in the bid item 17 Mobilization and Demobilization.
- The compaction shall be 90% minimum relative compaction in accordance with ASTM D1557 for the entire water line installation.
- Replacing pages 21-25 with the attached revised pages 21-25. The revision includes the addition of Item 6 (originally left out) as 18" Grip Rings – 8 each, Item 18 as 18" 90° Bend (MJ) – 1 each and Item 19 as 12" Grip Ring – 1 each.
- Part of the call out at Station 4+16.64 reads "3-18" Grip Rings" on both the plan and profile. This shall be replaced with "2-18" Grip Rings and 1-12" Grip Ring.
- Part of the call out at Station 4+16.64 reads "Stub Out 10' of 12" D.I. Pipe" on both the plan and profile. This shall be replaced with "Stub Out 10' of 12" D.I. Pipe with End Cap". No grip ring or thrust block is required at the end cap as this 12" valve shall remain off.
- The width of the fill area from Station 1+50 to 3+80 is 20 feet.

- The contractor will be responsible for securing the source for the borrow embankment.

3. GENERAL INFORMATION:

- a) The static pressure of the water line is 70 psi.
- b) The quantity shown in Bid Item 1 (Unclassified Excavation) is a bank cubic yard or unadjusted quantity.
- c) The quantity shown in Bid Item 2 (Borrow Embankment) is an Unclassified Embankment quantity. In other words this is a bank cubic yard or unadjusted quantity.
- d) The fill shall meet the specifications for structural fill Section 200.01.09.

Dated this 30th day of January 2012.
